**For The Re-Inhabited Republic For Florida**  
**Article – The Republic Of North America.**  
**Jumping Forward and Looking Backward.**

**TO:**       **Honorable MICHAEL BISHOP**, Governor, Florida  
State Officers:  Clyde Cleveland, Robert Elling, Beverly Killmore,  
                          Kristy Lefferts, Craig Pearson, Susan Price.

**From:**     Jim Costa  
**Date:**     Nov. 13, 2024

**The Problem:**

If we assume that we end up as The Republic For North America to include Canada, how did we get there. Can we resolve how this occurs as a mental experiment?

**Facts & Assumptions:**

- A) It has long been seen by those with premonitions that this is where the Re-Inhabited Republic will end up - as the Republic For North America.
- B) For simplicity sake, let's assume that the Military Intelligence, White Hats, Self Organizing Collectives and Trump are all one, hereinafter referred to as "Trump".
- C) In prior Proposals authored by this writer, it was theorized that:
- 1) We cannot train Judicial officers and County Court Clerks that are non-lawyers or legally trained in some manner already, to be functioning judicial officers in a few months. Therefore, we must assume Trump has a plan to do this for us.
  - 2) To either roll all 51 pre-Civil War Constitutions forward OR the current Constitutions backwards to 1871, would require a great many Constitutional Experts at least a year to do this. Then those change would have to be voted on for acceptance.  
  
Our Interim volunteers do not have the time, intelligence or money to accomplish this now. Therefore, we must assume Trump has already done this.
  - 3 The State Republics' main job is to stand-up Assemblies immediately as that is what will remain of the interim personnel to carry on the republics; they will run the future country.  
  
This will never change while everything else interim might be just booster rockets that may fall away.
- D) During the American Revolution, John Paul Jones fought many battles with a small Privateer with

just a few cannons on board. He later was given a small warship, the Bonhomme Richard, by France.

His first battle with it was with the Serapis, much larger in cannons than his ship.

He won that battle but his ship was sinking. He decided to move his flag to the Serapis rather than send it to be sold.

E) Trump now must decide to(o):

1) Keep the current corporate government and get sworn in around Jan 20<sup>th</sup> or let it sink into bankruptcy and dissolve all of its contracts with its citizens, world governments and vendors.

This would free our country of its debts.

2) Or create a new Expanded National Republic For The United States (of North America).

F) If Trump keeps the current government it will take years to roll its Constitution forward in principle then to have it ratified by each state.

If he creates a new Republic (Constitution), it could be stood up as a beacon for all the states to join it.

In this manner, that constitution could already be written over the past few years by Trump.

All that remains to do is simply raise the flag of it and see who salutes it.

This is down and dirty but quick and simple. States will ratify it by joining it.

All of the Nation States can decide to salute it, in their own time frame or in unison.

G) Recall that in two prior Proposals this writer warned that if Generals brought in the Military when the Corporate governments collapse, they had a time limit to pass off the their country to a new government.

If the Military takes too long, the Generals would be guilty of Treason as they now have a Junta on their hands. If they created the government then they were also Treasonous. The receiving government must be grass roots and immediately available for the Generals to survive doing their job.

H) Also recall that this nation was created as a Confederation and a few years later reformed itself into another entity, the Republic.

If this is done again by trump then the generals can escape Treason and yet still have a hand in creating a fast new expanded Republic by passing off to a grass roots government, which later changes it's collective mind, one state at a time.

**The Plan:**

- 1) Plan on the Military to pass off to the re-inhabited Nation States with it's vision of a Re-inhabited National Republic.

Then anticipate the appearance of an alternate National Government, possibly absorbing the National Re-inhabited Republic by invitation.

- 2) Immediately fast-Track assembly formations as they are the real grass roots of the Republics.
- 3) Focus on training of talented Assembly members, State and National Officers.
- 4) Realize we are a stepping stone and ease up on getting bogged down of unneeded paper chases.
- 5) Recognize that we are a volunteer organization and they are short-lived without funding and tend to dissolve quickly. We must get this accomplished immediately before we break apart due to non-governmental issues bleeding into our efforts, such as religious overtones.

**Costs**    Zero

**Pros:**

**Cons:**

**No Action Requested From Anyone.**
