

PROPOSAL
Florida Re-Inhabited Republic
One Secretary Server Computer
Proposal Method, Part III

TO: All Members
From: Jim Costa
Date: Dec 10, 2024

The Problem:

Without financial support, how can we immediately begin serving Florida members of assemblies in writing their proposals?

Facts & Assumptions:

A) To provide just one laptop to 67 Florida counties would require \$25,000.
To provide one laptop for the state would cost \$400.

B) One laptop could be stationed In the home of a volunteer secretary.
Members in the state could link remotely into that laptop and use the
Voice to translate the proposal into Technical writing.

The Secretary could then polish the Proposal and send it out Email-Merge Software.

C) Most computers already have software installed to allow long distance links
to another computer.

D In “B” above, the member could purchase a [\\$17 handheld Dictaphone tape recorder](#)
and draft your proposal over a period of time. When completed, the member can send
the audio file into the secretary computer or call in and play the recoding over the phone.

E) It is recognized that all members may not choose to participate to the degree of writing
Proposals. But for those anxious to become stronger leaders, they will be anxious to begin
their new journey.

F) This is one Speech to Type software with easy instructions to install on both Windows or
Linux base systems. [Link](#)

G) The software to be accessed by writers are: Voice to Type, AI Research Tools and a special
AI Add-On to convert writing into a clear and concise Technical Writing style.

The Plan:

- 1) Purchase one secretary Laptop for the state.
- 2) Or upgrade an existing computer by adding free software to it, at zero cost.
This could be done in all counties so two members could buddy-up.
- 3) Explore to see if the required software can be installed on FlaRepublic.US website and run by members there.

This option easily makes it available to all without an “appointment”.

Costs Zero or \$400.

Pros:

Gets it done immediately and cheaply.

This gives us time to seek out a major investor and eventually properly equip our dedicated members.

Cons:
